

**IN THE UNITED STATES DISTRICT COURT  
FOR THE EASTERN DISTRICT OF PENNSYLVANIA**

DELAWARE RIVERKEEPER NETWORK,  
and the DELAWARE RIVERKEEPER,  
MAYA VAN ROSSUM,

Plaintiffs,

Case No. 2:20-cv-03412-MMB

UNITED STATES ENVIRONMENTAL PROTECTION AGENCY and MICHAEL S. REGAN, in his official capacity as the Administrator of the United States Environmental Protection Agency,

### Defendants.

**DEFENDANTS' MOTION FOR  
REMAND WITHOUT VACATUR**

Defendants the United States Environmental Protection Agency and Michael S. Regan, in his official capacity as the Administrator of the United States Environmental Protection Agency (collectively, “EPA”), by and through their counsel, respectfully request that the Court remand, without vacatur, EPA’s Section 401 Certification Rule that revised the implementing regulations for state certification of federal licenses and permits that may result in any discharge into waters of the United States pursuant to section 401 of the Clean Water Act (“CWA”), 33 U.S.C. § 1341. Remand is appropriate here because EPA has announced its intention to reconsider and revise the Certification Rule. *Notice of Intention to Reconsider and Revise the Clean Water Act Section 401 Certification Rule*, 86 Fed. Reg. 29,541 (June 2, 2021) (“Notice”). EPA has “determined that it will reconsider and propose revisions to the rule through a new rulemaking effort.” Goodin Decl.

1 Defendants have conferred with the parties regarding this motion. Plaintiffs plan to  
 2 oppose this motion, according to the briefing schedule set out in Defendants' June 18, 2021  
 3 status report. Defendant-Intervenors do not object to the motion based on counsel for  
 4 Defendants' description, but reserve the right to file a response if they think one is necessary,  
 5 after seeing the motion.

6 **BACKGROUND**

7 On July 13, 2020, EPA's final rule, *Clean Water Act Section 401 Certification Rule*, was  
 8 published. 85 Fed. Reg. 42,210 (the "Certification Rule" or the "Rule"). The Certification Rule  
 9 became effective on September 11, 2020. On January 20, 2021, President Biden issued  
 10 Executive Order 13,990, *Protecting Public Health and the Environment and Restoring Science to*  
 11 *Tackle the Climate Crisis*. 86 Fed. Reg. 7037 (Jan. 25, 2021). Executive Order 13,990 stated that  
 12 it is the policy of the new administration:

13 to listen to the science; to improve public health and protect our environment; to  
 14 ensure access to clean air and water; to limit exposure to dangerous chemicals and  
 15 pesticides; to hold polluters accountable, including those who disproportionately  
 16 harm communities of color and low-income communities; to reduce greenhouse  
 17 gas emissions; to bolster resilience to the impacts of climate change; to restore and  
 18 expand our national treasures and monuments; and to prioritize both  
 19 environmental justice and the creation of the well-paying union jobs necessary to  
 20 deliver on these goals.

21 *Id.* at 7037. Executive Order 13,990 directs federal agencies to "immediately review and, as  
 22 appropriate and consistent with applicable law, take action to address the promulgation of  
 23 Federal regulations and other actions during the last 4 years that conflict with these important  
 24 national objectives, and to immediately commence work to confront the climate crisis." *Id.* The  
 25 Certification Rule was specifically listed in a subsequent White House Statement as one of the  
 26 agency actions to be reviewed pursuant to the Executive Order for potential suspension, revision  
 27 or rescission.<sup>1</sup>

---

28 <sup>1</sup> Fact Sheet: List of Agency Actions for Review, available at <https://www.whitehouse.gov/briefing-room/statements-releases/2021/01/20/fact-sheet-list-of-agency-actions-for-review/> (last accessed on May 20, 2021).

1 Plaintiffs filed this case on July 13, 2020, alleging that EPA violated the Administrative  
 2 Procedure Act because the Certification Rule is “arbitrary, capricious, an abuse of discretion, or  
 3 otherwise not in accordance with law,” Compl. ¶ 304 (citing 5 U.S.C. § 706(2)(A)); is “in excess  
 4 of statutory jurisdiction, authority or limitations, and is short of statutory right,” Compl. ¶¶ 317,  
 5 325 (citing 5 U.S.C. § 706(2)(C)); and “is contrary to constitutional right, power, privilege, or  
 6 immunity,” Compl. ¶ 331 (citing 5 U.S.C. § 702(2)(B)) (Dkt. No. 1). On September 14, 2020,  
 7 EPA moved to dismiss. Dkt. No. 16. The Court denied EPA’s motion to dismiss on December  
 8 18, 2020. Dkt. No. 47. Pursuant to the parties’ stipulation, the Court then held the case in  
 9 abeyance until June 4, 2021, to allow EPA time to determine a course of action with respect to  
 10 the Certification Rule in light of the Executive Order. Dkt. Nos. 57, 61.

11 EPA has completed its initial review of the Certification Rule and determined that it will  
 12 undertake a new rulemaking effort to propose revisions due to substantial concerns with the  
 13 existing Rule. *Notice*, 86 Fed. Reg. 29,541 (June 2, 2021). As explained in the Notice and  
 14 Goodin Declaration, EPA is reconsidering numerous topics in the Certification Rule. 86 Fed.  
 15 Reg. at 29,542-44; Goodin Decl. ¶ 15. The specific topics that EPA has committed to  
 16 reconsidering as part of that process include:

- 17 • the utility of the pre-filing meeting process to date, including whether the pre-filing  
     meeting request component of the Rule has improved or increased early stakeholder  
     engagement, whether the minimum 30 day timeframe should be shortened in certain  
     instances (*e.g.*, where a certifying authority declines to hold a pre-filing meeting), and  
     how certifying authorities have approached pre-filing meeting requests and meetings  
     to date;
- 18 • the sufficiency of the elements described in 40 C.F.R. § 121.5(b) and (c), and whether  
     stakeholders have experienced any process improvements or deficiencies by having a  
     single defined list of required certification request components applicable to all  
     certification actions;
- 19 • the process for determining and modifying the “reasonable period of time,” including  
     whether additional factors should be considered by federal agencies when setting the

- 1       “reasonable period of time,” whether other stakeholders besides federal agencies have  
2       a role in defining and extending the reasonable period of time, and any  
3       implementation challenges or improvements identified through application of the  
4       Rule’s requirements for the “reasonable period of time”;
- 5       • the Rule’s interpretation of the scope of certification and certification conditions, and  
6       the definition of “water quality requirements” as it relates to the statutory phrase  
7       “other appropriate requirements of State law,” including whether the Agency should  
8       revise its interpretation of scope to include potential impacts to water quality not only  
9       from the “discharge” but also from the “activity as a whole” consistent with Supreme  
10      Court case law, whether the Agency should revise its interpretation of “other  
11      appropriate requirements of State law,” and whether the Agency should revise its  
12      interpretation of scope of certification based on implementation challenges or  
13      improvements identified through the application of the newly defined scope of  
14      certification;
- 15       • the certification action process steps, including whether there is any utility in  
16       requiring specific components and information for certifications with conditions and  
17       denials; whether it is appropriate for federal agencies to review certifying authority  
18       actions for consistency with procedural requirements or any other purpose, and if so,  
19       whether there should be greater certifying authority engagement in the federal agency  
20       review process including an opportunity to respond to and cure any deficiencies;  
21       whether federal agencies should be able to deem a certification or conditions as  
22       “waived,” and whether, and under what circumstances, federal agencies may reject  
23       state conditions;
- 24       • enforcement of CWA Section 401, including the roles of federal agencies and  
25       certifying authorities in enforcing certification conditions; whether the statutory  
26       language in CWA Section 401 supports certifying authority enforcement of  
27       certification conditions under federal law; whether the CWA citizen suit provision  
28

- 1 applies to Section 401; and the Rule’s interpretation of a certifying authority’s  
2 inspection opportunities;
- 3 • modifications and “reopeners,” including whether the statutory language in CWA  
4 Section 401 supports modification of certifications or “reopeners,” the utility of  
5 modifications (*e.g.*, specific circumstances that may warrant modifications or  
6 “reopeners”), and whether there are alternate solutions to the issues that could be  
7 addressed by certification modifications or “reopeners” that can be accomplished  
8 through the federal licensing or permitting process;
- 9 • the neighboring jurisdiction process, including whether the Agency should elaborate  
10 in regulatory text or preamble on considerations informing its analysis under CWA  
11 Section 401(a)(2), whether the Agency’s decision to make a determination under  
12 CWA Section 401(a)(2) is wholly discretionary, and whether the Agency should  
13 provide further guidance on the Section 401(a)(2) process that occurs after EPA  
14 makes a “may affect” determination;
- 15 • application of the Certification Rule, including impacts of the Rule on processing  
16 certification requests, impacts of the Rule on certification decisions, and whether any  
17 major projects are anticipated in the next few years that could benefit from or be  
18 encumbered by the Certification Rule’s procedural requirements;
- 19 • existing state CWA Section 401 procedures, including whether the Agency should  
20 consider the extent to which any revised rule might conflict with existing state CWA  
21 Section 401 procedures and place a burden on those states to revise rules in the  
22 future; and
- 23 • facilitation of implementation of any rule revisions, including whether, given the  
24 relationship between federal provisions and state processes for water quality  
25 certification, EPA should consider specific implementation timeframes or effective  
26 dates to allow for adoption and integration of water quality provisions at the state  
27 level, and whether concomitant regulatory changes should be proposed and finalized  
28 simultaneously by relevant federal agencies (*e.g.*, the United States Army Corps of

1 Engineers and the Federal Energy Regulatory Commission) so that implementation of  
 2 revised water quality certification provisions would be more effectively coordinated  
 3 and would avoid circumstances where regulations could be interpreted as inconsistent  
 4 with one another.

5 86 Fed. Reg. at 29,542-44; Goodin Decl. ¶ 15. EPA is conducting initial stakeholder outreach by  
 6 taking written input through a public docket that will be open until August 2, 2021, 60 days after  
 7 publication of the Notice in the Federal Register. 86 Fed. Reg. at 29,541. After considering  
 8 public input and information provided during stakeholder meetings, EPA will draft new  
 9 regulatory language and supporting documents and submit the draft rule to the Office of  
 10 Management and Budget (“OMB”). Goodin Decl. ¶¶ 20-22. EPA expects the proposed rule  
 11 detailing revisions to the Certification Rule will be published in the Federal Register in Spring  
 12 2022, which will initiate a public comment period. *Id.* ¶ 23. Following the public comment  
 13 period on the proposed rule, EPA plans to review comments and other input, develop the final  
 14 rule, and submit it to OMB for interagency review. *Id.* ¶¶ 24-26. EPA expects to sign a final rule  
 15 in Spring 2023. *Id.* ¶ 27.

#### **STANDARD OF REVIEW FOR VOLUNTARY REMAND**

17 Administrative agencies have an “inherent authority to reconsider [their] own decisions,  
 18 since the power to decide in the first instance carries with it the power to reconsider.” *Elchik v.*  
 19 *Akustica, Inc.*, Civil Action No. 12-578, 2013 WL 1405215 at \*8, (W.D. Pa. Mar. 6, 2013)  
 20 (quoting *Trujillo v. Gen. Elec. Co.*, 621 F.2d 1084, 1086 (10th Cir. 1980)). To that end, “when  
 21 federal agencies take erroneous or unlawful action, courts generally should not stand in the way  
 22 of the agencies’ remediation of their own mistakes.” *The Last Best Beef, LLC v. Dudas*, 506  
 23 F.3d 333, 340 (4th Cir. 2007).

24 “[A]n agency may file a motion for voluntary remand ‘without confessing error, to  
 25 reconsider its previous position,’ when its action is before a federal district court for review.”  
 26 *Makhteshim Agan of N. Am., Inc. v. Nat'l Marine Fisheries Serv.*, No. 18-cv-961-PWG, 2019  
 27 WL 5964526, at \*2 (D. Md. Oct. 18, 2019) (quoting *Ohio Valley Envtl. Coal. v. Aracoma Coal*  
 28 *Co.*, 556 F.3d 177, 215 (4th Cir. 2009)). A remand is “generally required” if “intervening

1 events outside of the agency’s control” “affect the validity of the agency action.” *SKF USA*  
 2 *Inc. v. United States*, 254 F.3d 1022, 1028 (Fed. Cir. 2001). But “even if there are no  
 3 intervening events, the agency may request a remand (without confessing error) in order to  
 4 reconsider its previous position.” *Id.* at 1029. Courts “generally grant an agency’s motion to  
 5 remand so long as ‘the agency intends to take further action with respect to the original agency  
 6 decision on review.’” *Util. Solid Waste Activities Grp. v. Env’t Prot. Agency*, 901 F.3d 414,  
 7 436 (D.C. Cir. 2018) (citation omitted).

## 8                   ARGUMENT

9               When determining whether to grant a motion for voluntary remand, courts consider  
 10 whether: (1) the agency has identified “substantial and legitimate” concerns in support of  
 11 remand, *SKF*, 254 F.3d at 1029; (2) remand supports “judicial economy,” *see, e.g., Ethyl Corp.*  
 12 *v. Browner*, 989 F.2d 522, 524 (D.C. Cir. 1993) (granting EPA’s opposed motion for voluntary  
 13 remand) (“We commonly grant such motions, preferring to allow agencies to cure their own  
 14 mistakes rather than wasting the courts’ and the parties’ resources . . . .”); and (3) voluntary  
 15 remand would not cause “undue prejudice” to the parties, *FBME Bank Ltd. v. Lew*, 142 F. Supp.  
 16 3d 70, 73 (D.D.C. 2015). Here, the balance of all three factors weighs in favor of remand.

17           **First**, voluntary remand is appropriate because EPA has identified “substantial and  
 18 legitimate concerns” with the Certification Rule and has publicly announced its intention to  
 19 reconsider and revise the Rule. *SKF*, 254 F.3d at 1029 (“[I]f the agency’s concern [with the  
 20 challenged action] is substantial and legitimate, a remand is usually appropriate.”). Specifically,  
 21 EPA has identified “substantial concerns with a number of provisions of the 401 Certification  
 22 Rule that relate to cooperative federalism principles and CWA Section 401’s goal of ensuring  
 23 that states are empowered to protect their water quality.” 86 Fed. Reg. at 29,542. EPA also has  
 24 substantial concerns about whether the Certification Rule “constrains what states and Tribes  
 25 can require in certification requests, potentially limiting state and tribal ability to get  
 26 information they may need before the CWA Section 401 review process begins.” *Id.* at 29,543.  
 27 Likewise, EPA “is concerned that the rule does not allow state and tribal authorities a sufficient  
 28 role in setting the timeline for reviewing certification requests and limits the factors that federal

1 agencies may use to determine the reasonable period of time.” *Id.* EPA is also “concerned that  
 2 the rule’s narrow scope of certification and conditions may prevent state and tribal authorities  
 3 from adequately protecting their water quality.” *Id.* And EPA “is concerned that a federal  
 4 agency’s review may result in a state or tribe’s certification or conditions being permanently  
 5 waived as a result of nonsubstantive and easily fixed procedural concerns identified by the  
 6 federal agency [and] that the rule’s prohibition of modifications may limit the flexibility of  
 7 certifications and permits to adapt to changing circumstances.” *Id.* at 29,543-44. These  
 8 concerns mirror many of Plaintiffs’ allegations. *See Compl.* ¶¶ 224-63.

9 Courts have granted remand in similar situations. For example, in *SKF USA Inc. v.*  
 10 *United States*, the Federal Circuit found a remand to the Department of Commerce appropriate  
 11 in light of the agency’s change in policy. 254 F.3d at 1025, 1030. Likewise, in *FBME Bank*  
 12 *Ltd. v. Lew*, the District Court for the District of Columbia remanded a rulemaking to the  
 13 Department of the Treasury to allow the agency to address “serious ‘procedural concerns’”  
 14 with the rule, including “potential inadequacies in the notice-and-comment process as well as  
 15 [the agency’s] seeming failure to consider significant, obvious, and viable alternatives.” 142 F.  
 16 Supp. 3d at 73.

17 A confession of error is not necessary for voluntary remand so long as the agency is  
 18 committed to reconsidering its decision. *SKF*, 254 F.3d at 1029. For example, remand may be  
 19 appropriate if an agency “wishes to consider further the governing statute, or the procedures  
 20 that were followed,” or if an agency has “doubts about the correctness of its decision or that  
 21 decision’s relationship to the agency’s other policies.” *Id.*; *see also Limnia, Inc. v. U.S. Dep’t of*  
*22 Energy*, 857 F.3d 379, 387 (D.C. Cir. 2017) (an agency does not need to “confess error or  
*23 impropriety in order to obtain a voluntary remand” so long as it has “professed [an] intention to*  
*24 reconsider, re-review, or modify the original agency decision that is the subject of the legal*  
*25 challenge.”). That standard is met here, as EPA has made clear that it intends to reconsider and  
 26 revise the Certification Rule to address “substantial concerns” associated with the Rule. 86 Fed.  
 27 Reg. at 29,542; Goodin Decl. ¶ 14. Along with receiving public input through a docket, EPA has  
 28*

1 held a series of webinar-based listening sessions to solicit stakeholder feedback on potential  
 2 approaches to revise the Certification Rule. 86 Fed. Reg. at 29,544; Goodin Decl. ¶ 17.

3 In sum, “an agency must be allowed to assess ‘the wisdom of its policy on a continuing  
 4 basis.’” *Ohio Valley Env’t Coal.*, 556 F.3d at 215 (citation omitted). EPA’s actions are consistent  
 5 with that principle, and this Court “should permit such a remand in the absence of apparent or  
 6 clearly articulated countervailing reasons.” *Citizens Against Pellissippi Parkway Extension, Inc.*  
 7 *v. Mineta*, 375 F.3d 412, 416 (6th Cir. 2004).

8 **Second**, granting remand here is in the interest of judicial economy. “Remand has the  
 9 benefit of allowing ‘agencies to cure their own mistakes rather than wasting the courts’ and the  
 10 parties’ resources reviewing a record that both sides acknowledge to be incorrect or  
 11 incomplete.” *Util. Solid Waste*, 901 F.3d at 436 (quoting *Ethyl Corp.*, 989 F.2d at 522). Here,  
 12 allowing EPA to reconsider its decision made during the prior Administration—including the  
 13 legal basis and policy effects of the Rule—and address its substantial concerns with the Rule  
 14 through the administrative process will preserve this Court’s and the parties’ resources. *See*  
 15 *FBME Bank*, 142 F. Supp. 3d at 74; *see also B.J. Alan Co. v. ICC*, 897 F.2d 561, 562-63 n.1  
 16 (D.C. Cir. 1990) (“[A]dministrative reconsideration is a more expeditious and efficient means  
 17 of achieving adjustment of agency policy than is resort to the federal courts.” (quoting  
 18 *Pennsylvania v. ICC*, 590 F.2d 1187, 1194 (D.C. Cir. 1978))). Continuing to litigate the very  
 19 same issues that EPA is currently reconsidering “would be inefficient,” *FBME Bank*, 142 F.  
 20 Supp. 3d at 74, and a waste of scarce judicial resources.

21 In addition, continuing to litigate this case would interfere with EPA’s ongoing  
 22 reconsideration process by forcing the Agency to structure its administrative process around  
 23 pending litigation, rather than the Agency’s priorities and expertise. *See Am. Forest Res. Council*  
 24 *v. Ashe*, 946 F. Supp. 2d 1, 43 (D.D.C. 2013) (noting that because agency did “not wish to  
 25 defend” action, “forcing it to litigate the merits would needlessly waste not only the agency’s  
 26 resources but also time that could instead be spent correcting the rule’s deficiencies”), *aff’d*, 601  
 27 F. App’x 1 (D.C. Cir. 2015); *cf. Reg’l Mgmt. Corp. v. Legal Servs. Corp.*, 186 F.3d 457, 465  
 28

(4th Cir. 1999) (agencies have an “interest in crystallizing [their] policy before that policy is subject to review” (citation omitted)).

**Third**, any prejudice Plaintiffs may suffer due to a remand without vacatur would be limited here because EPA has committed to reconsidering the Certification Rule to ensure that Clean Water Act Section 401 is implemented in a manner consistent with the policies set forth in Executive Order 13,990, many of which implicate the same concerns that Plaintiffs have raised in this litigation. *See* 86 Fed. Reg. at 7037. As noted above, EPA is considering revising provisions in the Certification Rule related to many of the issues raised in this case:

- pre-filing meeting requests, *Notice*, 86 Fed. Reg. at 29,543;
- certification requests, 86 Fed. Reg. at 29,543; *see Compl.* ¶¶ 242, 299;
- reasonable period of time, 86 Fed. Reg. at 29,543; *see Compl.* ¶¶ 242, 299;
- scope of certification, 86 Fed. Reg. at 29,543; *see Compl.* ¶¶ 192, 211, 315-16;
- certification actions and federal agency review, 86 Fed. Reg. at 29,543; *see Compl.* ¶¶ 243-59;
- certifying authority enforcement of certification conditions, 86 Fed. Reg. at 29,543; *see Compl.* ¶¶ 260-63; and
- certifying authority modification of certifications, 86 Fed. Reg. at 29,543.

Moreover, EPA has committed to ensuring that stakeholders and the public, including Plaintiffs and Defendant-Intervenors, have the opportunity to provide input to EPA in its reconsideration process. *Notice*, 86 Fed. Reg. at 29,544; Goodin Decl. ¶¶ 17, 18, 23.

A new rulemaking process will necessarily take time, but Plaintiffs cannot demonstrate undue prejudice from the time required under the Administrative Procedure Act to revise agency regulations. Plaintiffs are not directly regulated by the Certification Rule, which regulates the conduct of states, federal agencies, tribes, and project proponents. Instead, Plaintiffs’ alleged harms all flow from the implementation of the Certification Rule to specific future projects. *See Compl.* ¶ 288 (“Plaintiffs’ . . . interests are imminently and adversely harmed by the Certification Rule because it creates a substantial risk that these waters will be degraded by Federally licensed or permitted activities.”). But those harms are too speculative to overcome EPA’s interest in remand, because they depend on a causal chain of events for potential future projects that may or

1 may not occur, including: (1) how a state may apply the Certification Rule to a specific project;  
 2 (2) how a federal agency will apply certifications and conditions to a particular project; (3) how  
 3 challenges to a state certification or condition would be adjudicated in a judicial or  
 4 administrative proceedings; and (4) whether resolution of any challenges or implementation  
 5 concerns would take longer than EPA’s rulemaking process.

6 Plaintiffs’ allegations are “too abstract and speculative to clearly outweigh [remand’s]  
 7 benefits,” *Am. Forest Res. Council*, 946 F. Supp. 2d at 44, including allowing EPA to address its  
 8 concerns with the Certification Rule, and potentially Plaintiffs’ concerns as well, through the  
 9 administrative process. Further, in the interim, Plaintiffs continue to have the option to challenge  
 10 individual 401 certifications or federal actions taken pursuant to the Certification Rule as they  
 11 arise, to the extent they may threaten imminent, concrete harm to a party or its members in the  
 12 future. *See Ohio Forestry Ass’n, Inc. v. Sierra Club*, 523 U.S. 726, 734 (1998) (Plaintiff “will  
 13 have ample opportunity later to bring [their] legal challenge” in the context of a future agency  
 14 action applying the challenged plan “when harm is more imminent and more certain.”).

15 Furthermore, any possible prejudice to Plaintiffs caused by the Rule remaining in effect  
 16 while EPA revises it pursuant to the required process of the Administrative Procedure Act should  
 17 not be considered “undue” prejudice. During the rulemaking period, EPA is committed to  
 18 providing technical assistance to all stakeholders regarding interpretation and implementation of  
 19 the Certification Rule and working with its federal agency partners to address implementation  
 20 concerns raised by Plaintiffs. Goodin Decl. ¶¶ 29-30. EPA’s efforts may mitigate or eliminate  
 21 alleged potential harms of concern to Plaintiffs.

## 22 CONCLUSION

23 EPA has identified numerous concerns with the Certification Rule, many of which have  
 24 been raised by Plaintiffs in this case, and has already begun reconsidering the Rule. Where an  
 25 agency has committed to reconsidering the challenged action, the proper course is remand to  
 26 allow the agency to address its concerns through the administrative process. *See Dudas*, 506 F.3d  
 27 at 340. Rather than requiring EPA to litigate a rule that it is currently reconsidering, Defendants  
 28 respectfully ask the Court to remand the Certification Rule to the Agency without vacatur.

1 Respectfully submitted this 1st day of July 2021.

## **CERTIFICATE OF SERVICE**

I hereby certify that on this date, I caused a true and correct copy of the foregoing Motion for Remand without Vacatur to be filed with the Clerk of Court using the CM/ECF system, which will send electronic notification of such filing to all counsel of record.

Date: July 1, 2021

s/ Elisabeth Carter  
Elisabeth H. Carter  
Attorney for Defendants
